

SHRAVANI PATIL

React + TypeScript + Tailwind CSS Portfolio Rebuild

MASTER BUILD BRIEF FOR GITHUB COPILOT

BUILD TARGET

A production-quality, high-end personal portfolio rebuilt as a React + TypeScript + Vite application using Tailwind CSS.

DESIGN CONCEPT

SHRAVANI.OS — a personal operating-system / developer command-center experience.

PRIMARY GOAL

Replace the current generic student-template feel with a memorable, recruiter-friendly software/developer portfolio without inventing information.

Technology direction: React + TypeScript + Vite + Tailwind CSS. Tailwind's current documentation supports an official Vite integration, and React documents first-class TypeScript support for React components.

■cite■turn0search0■turn0search12■

1. COPY-PASTE MASTER PROMPT FOR GITHUB COPILOT

You are the lead frontend engineer and product designer rebuilding my personal portfolio.

REBUILD THE PORTFOLIO AS:

- React
- TypeScript
- Vite
- Tailwind CSS
- Lucide React for icons where useful
- Framer Motion only where it materially improves interaction; otherwise use CSS transitions
- No Bootstrap
- No generic portfolio template
- No unnecessary UI library
- Component-based architecture
- Strong accessibility and responsive behavior

IMPORTANT:

1. First inspect the existing repository, current HTML/CSS/JS, images, resume, project screenshots, links, and working features.
2. Preserve factual information from the existing project.
3. Do not invent projects, internships, metrics, technologies, testimonials, links, or achievements.
4. If a field is missing, use the existing repository value or leave a clearly marked data placeholder for me to fill.
5. Reuse existing assets where appropriate.
6. Migrate working functionality into React/TypeScript rather than simply wrapping the old HTML.
7. Build the UI from reusable components and data objects.
8. Keep the website fast, accessible, responsive, and deployment-ready.
9. The result must feel like a premium developer/product portfolio, not a college template.
10. After implementation, run the project, fix TypeScript errors, fix console errors, test mobile layouts, and verify every CTA/link/form.

DESIGN:

Dark premium, editorial, futuristic-minimal.

Near-black background, off-white typography, muted gray text, subtle borders, one electric-violet accent. Use large typography, asymmetrical layouts, restrained glass effects, grid/noise textures, subtle motion. Avoid excessive gradients, floating blobs, rainbow colors, circular profile-picture styling, fake skill percentages, and excessive cards.

SIGNATURE:

SHRAVANI.OS – personal operating system / command center.

2. REQUIRED TECH STACK + ARCHITECTURE

- React + TypeScript.
- Vite.
- Tailwind CSS.
- Lucide React.
- Framer Motion only if needed for polished motion.
- EmailJS may be retained for the current contact form.
- No Bootstrap and no unnecessary UI framework.

Recommended structure

```
src/
├── assets/
│   ├── images/
│   ├── projects/
│   ├── resume/
│   ├── components/
│   ├── layout/
│   ├── navigation/
│   ├── ui/
│   ├── hero/
│   ├── about/
│   ├── stack/
│   ├── projects/
│   ├── experience/
│   └── journey/
```

- ■■■ achievements/
- ■■■ contact/
- ■■■ footer/
- data/
- ■■■ profile.ts
- ■■■ projects.ts
- ■■■ skills.ts
- ■■■ experience.ts
- ■■■ education.ts
- hooks/
- lib/
- App.tsx
- main.tsx
- index.css

- Keep content in typed data objects rather than duplicated JSX.

3. SHRAVANI PATIL — PROFILE DATA

FIELD	VALUE
Name	Shravani Patil
Degree	B.Tech — Computer Science and Business Systems (CSBS)
College	KIT's College of Engineering, Kolhapur
Degree period	2025–2028
Diploma	Diploma in Computer Science & Engineering
Diploma institute	Sanjay Ghodawat Institute, Atigre
Diploma period	2022–2025
Diploma result	89.77%
Phone	9405238893
GitHub	@pshravani1276 — verify exact URL in repository
Interests	Cybersecurity • Web Development • Mobile App Development
Positioning	Developer • Cybersecurity Enthusiast • AI Project Builder

Copilot must inspect the existing repository for the exact public email, LinkedIn URL, GitHub URL, resume path, image paths, and project links. Never guess a URL.

4. SKILLS / TECH STACK DATA

PROGRAMMING

C, C++, Java, JavaScript, Python, SQL

FRONTEND

HTML, CSS, JavaScript, React

DATABASE

Oracle, MySQL, Firebase

SECURITY

OWASP ZAP, Splunk

TOOLS

Tableau, Visual Studio, Android Studio, Git, GitHub

SOFT SKILLS

Communication, Problem-Solving, Leadership, Team Management, Adaptability, Quick Learner, Critical Thinking

Replace fake proficiency percentages with skill clusters and evidence from projects.

5. HERO — DESIGN + CONTENT

SYSTEM ONLINE

SHRAVANI
PATIL

Computer Science × Software × Cybersecurity

I build practical software experiences, explore intelligent systems, and keep security in the room from the start.

[VIEW MY WORK ■] [DOWNLOAD RÉSUMÉ ↓]

● AVAILABLE FOR INTERNSHIPS

- Use existing professional portrait as a tall editorial image, not a circular avatar.
- Add small metadata: CSBS • DEVELOPER • SECURITY.
- Huge responsive heading.
- Subtle grid/noise background.
- Restrained stagger reveal.
- Subtle portrait parallax on desktop.
- Status badge pulse.
- CTA arrow/magnetic hover.
- Mobile: text first, portrait second.

6. SHRAVANI.OS — SIGNATURE FEATURE

```

■ SHRAVANI.OS v1.0.0 ■
■
■ $ whoami ■
■ Computer Science & Business Systems ■
■ Developer • Cybersecurity Enthusiast ■
■
■ $ currently_learning ■
■ React / Backend / Cybersecurity / AI ■
■
■ $ help ■
■ about stack work experience contact ■

```

- Build as a React component with state.
- Commands can navigate to sections.
- Keyboard accessible.
- Normal navigation remains available.
- Use monospace typography and subtle violet accents.

7. NAVIGATION + PAGE SECTIONS

- 01 ABOUT
- 02 STACK
- 03 WORK
- 04 EXPERIENCE
- 05 JOURNEY
- 06 CONTACT

- Sticky desktop navbar; transparent at top, blurred/dark after scroll.
- Accessible mobile menu.
- Scroll progress indicator.

- Smooth anchor navigation.

8. ABOUT

01 — WHO I AM

I DON'T JUST LEARN TECHNOLOGIES.
I BUILD WITH THEM.

- Short profile paragraph focused on software development, cybersecurity, web/mobile development and practical projects.
- Three blocks: CURRENTLY / FOCUS / BASED IN.
- Avoid a long generic biography.

9. STACK

- DEVELOPMENT — C • C++ • Java • Python • JavaScript
- FRONTEND — HTML • CSS • JavaScript • React
- DATABASE — Oracle • MySQL • Firebase
- SECURITY — OWASP ZAP • Splunk
- TOOLS — Tableau • Visual Studio • Android Studio • Git • GitHub
- Use contextual hover states instead of percentage bars.

10. FEATURED WORK

MediBridge

- Medicine/supplier/retailer management platform.
- Existing material includes landing page, authentication, retailer dashboard, orders, medicines, suppliers, expenses and charts.
- Use existing screenshots as a case-study gallery.
- Only show exact technologies and links supported by the repository.

Café Management System

- Practical management project built during the iGAP web-development internship.
- Use existing screenshots/repository to determine exact features and technology.
- Make this one of the two primary featured projects.

Other/Archive Projects

- Hotel Management System — C/C++/Java — diploma project.
- Airline Ticket Reservation — VB.Net — diploma project.
- These can be shown in a secondary 'Other Work' area rather than competing with the primary projects.

Project card requirements

- Large screenshot/media.
- Project number + title.
- One-line problem/solution.
- Technology tags.
- Role/period when known.
- What I built.
- What I learned.
- Real GitHub/Live Demo links only.
- Hover image scale + CTA arrow.
- Optional case-study modal/dedicated route.

11. EXPERIENCE

Web Development Intern — iGAP Technology Pvt. Ltd.

- Duration: 45 days.
- Project association: Café Management Project.
- Use exact responsibilities from the repository/resume; do not invent them.

Cyber Security Intern — Future Intern

- Include only if the current repository confirms this entry.
- Do not invent dates, tasks, or achievements.

12. EDUCATION / JOURNEY

- 2025–2028 — B.Tech CSBS — KIT's College of Engineering, Kolhapur.
- 2022–2025 — Diploma CSE — Sanjay Ghodawat Institute, Atigre — 89.77%.
- If an SGPA/CGPA is shown, use the current verified repository value and avoid conflicting numbers.

13. PROOF OF WORK / ACHIEVEMENTS

- 70/70 — Digital Techniques
- 89.77% — Diploma result
- 45 DAYS — Web development internship
- Nimbus 2k25 — Volunteer
- Research Paper — IJSREM
- Infosys SpringBoard — Introduction to Data Science
- Infosys SpringBoard — Prompt Engineering for Developer
- Udemy — Python for Data Analysis
- Udemy — Diploma in MongoDB

14. CONTACT

HAVE AN IDEA?
LET'S BUILD IT.

Open to internships, collaborations, and interesting software problems.

[EMAIL] [LINKEDIN] [GITHUB]

[CONTACT FORM]

- Read exact public email/LinkedIn/GitHub values from the existing repository.
- Retain EmailJS if it currently works.
- Typed form state: idle/loading/success/error.
- Validate inputs and provide accessible error messages.
- Never expose private credentials.

15. TAILWIND DESIGN SYSTEM

Background: #080808
Surface: #0F0F10
Surface 2: #141416
Text: #F5F5F5
Muted: #8A8A8A
Border: rgba(255, 255, 255, 0.10)
Accent: #8B5CF6
Accent soft: rgba(139, 92, 246, 0.14)

Typography:
Display — Inter / Geist / Manrope / Space Grotesk
Mono — JetBrains Mono / IBM Plex Mono

- Use CSS variables/theme values for brand tokens.
- Tailwind utilities for layout, spacing, typography and states.
- Avoid random colors and excessive gradients.

- Use restrained glass effects.

16. REACT COMPONENT MAP

- AppShell
- Navbar
- MobileMenu
- ScrollProgress
- HeroSection
- PortraitCard
- StatusBadge
- ShravaniOS
- SectionHeading
- AboutSection
- StackSection
- TechCluster
- FeaturedProjects
- ProjectCard
- ProjectCaseStudyModal
- ExperienceTimeline
- EducationTimeline
- AchievementGrid
- CertificationStrip
- GithubBlock
- ContactSection
- ContactForm
- Footer

17. MOTION

- Hero text stagger reveal.
- Scroll-triggered section reveals.
- Subtle desktop cursor glow.
- Magnetic CTA hover.
- Project image parallax/scale.
- Navbar blur on scroll.
- Scroll progress.
- Terminal typing/command feedback.
- Timeline hover highlight.
- Button arrow translation.
- prefers-reduced-motion support.

Premium rule: motion should establish hierarchy, not animate everything.

18. RESPONSIVE DESIGN

- 1200px+: editorial two-column hero, large project media and wide layouts.
- 768–1199px: reduce typography and collapse some grids.
- <768px: single-column, compact nav, no custom cursor, touch-friendly controls.
- No horizontal overflow.
- Terminal wraps or scrolls internally.
- Project screenshots remain readable.
- Use responsive Tailwind utilities and clamp() where helpful.

19. ACCESSIBILITY + PERFORMANCE

- Semantic HTML landmarks.
- Keyboard-accessible navigation, modal and terminal.
- Visible focus states.
- Useful alt text.
- Good contrast.
- Do not communicate information through color alone.
- Lazy-load non-critical images.
- Avoid unnecessary dependencies.
- No TypeScript errors.
- No console errors.
- Respect reduced motion.

20. MIGRATE EXISTING FUNCTIONALITY

- Smooth scrolling → React navigation/anchor utility.
- Typing animation → typed React component/hook.
- Gallery/lightbox → typed React modal/gallery.
- Counters → reusable Counter component if still needed.
- EmailJS → typed ContactForm.
- Mobile navbar → accessible React menu.
- Reveal animations → IntersectionObserver hook or Framer Motion.
- Existing assets → Vite-compatible src/assets or public structure.

21. IMPLEMENTATION ORDER

- **1.** Inspect repository, assets and current functionality.
- **2.** Create/verify React + TypeScript + Vite.
- **3.** Install/configure Tailwind.
- **4.** Create design tokens and base typography.
- **5.** Build AppShell + Navbar + ScrollProgress.
- **6.** Build Hero + PortraitCard + CTA.
- **7.** Build SHRAVANI.OS.
- **8.** Build About + Stack.
- **9.** Build Featured Projects + gallery/case study.
- **10.** Build Experience + Education.
- **11.** Build Achievements + Certifications.
- **12.** Build GitHub block.
- **13.** Build Contact + EmailJS migration.
- **14.** Build Footer.
- **15.** Add motion/polish.
- **16.** Responsive QA.
- **17.** Accessibility/performance audit.
- **18.** Production build and bug fixing.

22. PACKAGE GUIDANCE

```
Core:
react
react-dom
typescript
vite
tailwindcss
```

@tailwindcss/vite
lucide-react

Optional:
framer-motion
@emailjs/browser

Do not add packages unless they solve a real requirement.

Tailwind CSS currently documents the Vite plugin approach, while React documents TypeScript component development using .tsx files. ■cite■turn0search0■turn0search12■

23. FINAL QA CHECKLIST

- No HTML-only implementation remains except the Vite entry document.
- All interactive UI is React/TypeScript.
- Tailwind is the primary styling system.
- No placeholder # links.
- No fake data.
- Hero communicates identity immediately.
- Portrait is editorial/tall.
- SHRAVANI.OS works but is optional.
- Projects dominate visual hierarchy.
- MediBridge and Café Management are major case studies.
- Resume download works.
- Contact form works.
- GitHub/LinkedIn/email work.
- Mobile menu works.
- No horizontal overflow.
- No TypeScript errors.
- No console errors.
- No broken images.
- Keyboard navigation works.
- Reduced-motion works.
- Production build succeeds.

24. FINAL COMMAND TO COPILOT

Implement the complete portfolio rebuild from this document.

Do not only create a visual mockup.
Actually build the working React + TypeScript + Vite + Tailwind application.

First inspect my existing project and migrate its real content and working features.
Use the profile/project information in this document as the source of truth,
then verify exact URLs, assets and existing functionality from the repository.

Do not invent anything.

After implementation:

1. Run the development server.
2. Run TypeScript/build checks.
3. Fix all errors and warnings that affect the application.
4. Test desktop, tablet and mobile.
5. Test every button, navigation item, modal, gallery, form and external link.
6. Verify the resume download.
7. Verify the contact form.
8. Verify accessibility basics.
9. Verify no horizontal overflow.
10. Give me a final report with changed files, features added, features preserved, remaining placeholders, and any manual setup steps.

The finished portfolio must look like a premium software product:
minimal, dark, editorial, technical, memorable and recruiter-friendly.

END OF MASTER BUILD BRIEF
